Abstract (en)  
[origin: WO2008138736A1] The invention relates to a recuperating device, which is attached to a first rail (1) of a rail pair that can be installed in a piece of furniture, the second rail (2) of which can be displaced relative to the first rail (1), having a base body (4) and a driver (5) guided displaceably thereon under a tension spring load, the driver being positively engaged in the second rail (2) in the functional position, wherein the driver (5) is supported longitudinally displaceably on a guide strip (6) of the base body (4) in the manner of a slide.
