Abstract (en)

[origin: WO2008127002A1] The present embodiments relate to a dust separating apparatus for a vacuum cleaner. The dust separating apparatus for a vacuum cleaner includes a dust separator defining a plurality of air inlets; a dust outlet that is less in number than the air inlets, the dust outlet for discharging dust separated from air suctioned through the respective air inlets; and a dust container for storing dust discharged through the dust outlet.
