Abstract (en)

[origin: WO2008127003A1] The present embodiments relate to a dust separating apparatus for a vacuum cleaner. The dust separating apparatus includes a cyclone defining one or more inlets through which air is suctioned; a dust outlet through which dust separated in the cyclone is discharged; a dust container for storing dust discharged through the dust outlet; and a guide member provided on the cyclone, for guiding discharging of dust separated by cyclone airflow.
