Abstract (en)  
[origin: WO2008108631A1] The invention relates to a printing cylinder for a printing machine, or printing sleeve, for forming a printing cylinder, which printing cylinder or printing sleeve comprises a plurality of cups for forming a supporting inner structure for the printing cylinder or printing sleeve, which plurality of cups comprises a central disc and a radially outer edge, with the radially outer edges of the plurality of cups together defining a substantially cylindrical surface, characterized in that the plurality of cups comprises a first conical surface part. The invention also relates to a method for producing a printing cylinder, or printing sleeve. The invention also relates to a cup.
