Abstract (en)
[origin: WO2008135300A1] A drive system for a fitting, in particular a flap hinge for cupboards, has a housing (50) that can be secured to the body of a piece of furniture. An electric motor (38) provided on or in the housing (50) drives by means of gears (32) a coupling element (30) linked to a portion (7) of the fitting. The coupling element (30) is centrally arranged in the housing (50), in a direction perpendicular to the plane of motion of the portion (7) of the fitting. The drive system can be mounted on opposite sides of the body of a piece of furniture for driving a flap hinge (1).
