Abstract (en)
[origin: EP2166232A1] The side channel compressor (1) has a suction channel (14) and a blow-out channel (15), which are combined in a common housing (9) with a common partition (13) separating channels (11,12). The blow-out channel comprises an insulation (18) and the suction and blow-out channels have a parallel path, where an exchangeable switching insert is associated with a connection region is further provided on the side channel compressor.
