Abstract (en)  
[origin: EP2143854A1] The strip has a wall attachment bracket (10) provided with a plastics foam layer (14), and water-resistant and air permeable top layers (16) e.g. fibrous webs, provided on a side of the bracket. The top layers extend to an angular base (12), and are formed from thermally bonded plastic fibers, where the foam layer and the top layers are made of material i.e. polyethylene. The base includes a double-faced adhesive tape at upper and lower sides of the base, where the outer side of the base is tightly connected with an edge of a foil for a screed layer.
