Abstract (en)
[origin: EP2144337A1] The device i.e. power supply outlet (1), has a switch (8), and a plug-in part formed as a male connector (2) and movably guided in a moving direction relative to another plug-in part formed as a power socket. A power socket insert (6) guided by a retainer (5) is guided in a rotatably movable manner relative to the retainer. The male connector has an arresting element (4) fixed at the retainer by rotational movement. The power socket insert is coupled directly with an actuation device of the switch.
