Abstract (en)
[origin: EP2144443A1] The present invention relates to a network enabled digital video camera (20) arranged to be connected to a digital network. The network enabled digital video camera (20) comprises: a digital network module (24) arranged to transmit and receive digital signals, an input/output port (28) being an electrical connector and being connected to the digital network module (28), and an analog video generator (29) arranged to output an analog video signal. The input/output port (28) connected to the digital network module (24) is also being connected to the analog video generator (29). The present invention also relates to an adaptor (33) used to connect the network enabled digital video camera (20) to an off the shelf video preview device (32).
