Abstract (en)
[origin: WO2008134782A1] The invention relates to a pull-out guide (3) for drawers (6) comprising a first and at least one second rail (5, 7), at least one carriage (9) with load-transmitting roller bodies (10) being arranged between said two rails (5, 7). The carriage (9) can be coupled to the second rail (5), particularly when deviating from the differential course between the two rails (5, 7), characterized in that a rolling or sliding body (12) is mounted in a freely movable manner on or in the carriage (9), through which the carriage (9) can be coupled to a coupling part (8) on the second rail (5), and that a recess (14) is provided in the first rail (7) into which the rolling or sliding body (12) can be moved during opening of the drawer (6), wherein the coupling part (8) can be decoupled from the rolling or sliding body (12) and passes along the carriage (9).
