Abstract (en)

[origin: WO2008122481A1] The present invention relates to light-protective preparations, particularly in the field of cosmetics, based on mixed inorganic-organic systems. The present invention relates particularly to light-protective preparations containing nanoparticles of at least one metal derivative, at least one light-protective compound chemically bound to said metal derivative nanoparticles, and at least one additional organic UV light-protective agent which is different from the light-protective compound which is bound to the metal derivative nanoparticles.
