Abstract (en)

[origin: WO2008125688A2] The invention relates to an adapter device for the contamination-free removal of a material from a container (1), wherein the adapter device comprises a base body (5), which can be connected to the container (1) in a sealing fashion via an open section while surrounding a seal of the container (1), wherein the base body (5) comprises two access openings (3) by way of which the material present in the container (1) can be accessed without coming into contact with said material, and at least one additional access opening (4) into which the sample taken via the access opening (3) may be conducted, wherein the adapter device is made of a settable and separable film.
