Abstract (en)
[origin: WO2008117161A2] An apparatus for positioning a covering sheet (100) of a product (200), that is mountable to the side of a movement path (F; F') of said product (200) through a wrapping machine (50), comprising movement means (3; 103) provided with gripping means (4; 104) for removing said sheet (100) from an initial removing position (P), in which said sheet (100) is far from said product (200) and from said movement path (F; F'), and releasing said sheet (100) in a final releasing position (R), in which it is spread on the top of said product (200), characterised in that said movement means (3; 103) comprises arm means (5) and upright means (6) that are mutually connected and arranged so as to move linearly said gripping means (4, 104), between said initial removing position (P) and said final releasing position (R), along a first movement direction (H) and a second movement direction (V) that are mutually transverse.
