Abstract (en)

[origin: US2008277367A1] A one-piece squeeze and turn child resistant closure for a container having a threaded neck and a top shoulder having a top surface with at least one locking recessed annulus slot or groove, the closure comprising a sidewall of a rigid material, the sidewall further comprising at least one flexible panel wherein, when depressed, allows the unscrewing of the closure from the bottle, wherein each flexible panel includes at least one vertical tab that engages a corresponding locking recessed slot or groove of the container.
