Abstract (en)

[origin: WO2008125973A2] The invention relates to a slider (10, 10') for sliding doors of wardrobes and the like, wherein a roller (15) engaged in a guide provided on the wardrobe base accompanies the door movements. The roller is supported by a mechanism which allows it to be tilted over with respect to an axis (Z, Z') that is either perpendicular or parallel to the door in order to be engaged into the guide, thus simplifying the door installation process.
