Abstract (en)

[origin: WO2008135374A1] The invention relates to sidewalls for a range hood housing. In the joined state, the sidewalls form a hollow section. At least one sidewall (20, 10) is provided with at least one elongate cavity (21) that has at least three clamping zones (212) along the length thereof in order to non-positively fasten a locking element (12, 22), particularly a locking hook, of at least one second sidewall (10, 20). The invention further relates to a range hood comprising such a range hood housing.
