Abstract (en)
[origin: WO2008135376A2] The invention relates to a pull-out unit for a cooling device, comprising a carrying frame (10) having bars (14) extending in a pull-out direction, and a pull-out box (15) guided on the bars (14) in the pull-out direction in a displaceable manner. From the back to the front, the bars (14) consecutively comprise a horizontal first section (21), a second section (22) sloping from the back to the front, and an ascending third section (23). Ribs (16-17) extending along side walls of the pull-out box (15) are supported on the bars (14) in a displaceable manner, and have a contour inclining from the back to the front, facing the bars (14) in a rear region.
