Abstract (en)
[origin: WO2008138492A1] The invention relates to an operating device (1) with a rotary element (2) which may be rotated about a rotational axis (12) which may be tipped essentially perpendicular to the rotational axis and with a rotationally-fixed cap element (3) arranged over the rotary element (2), which may be tipped essentially perpendicular to the rotational axis, wherein the rotary element is coupled to the cap element (3), such that a tipping of the cap element (3) brings about a tipping of the rotary element (2).
