Abstract (en)

[origin: WO2008124181A1] A data center edition system and method are provided. In one embodiment, a software data center edition system comprises a computer installation, one or more nodes in the computer installation, each node having a plurality of computing devices wherein each computing device operates on a software platform and executes a deployment of a software application on the computing device so that the deployments of the software application are distributed across the data center, and the computer installation having a data center edition application that administers the installations of the software application distributed across the computer installation and provides a unified application management console.
