Abstract (en)

[origin: WO2008122347A2] Disclosed is a sheet-shaped support (10) that is made of a flexible material and is provided with a printed conductor (10) which is arranged on one side (12) of the support (10) and has an electrically conducting connection to a contact point (22) located on the other side (14) of the support (10). The electrically conducting connection between the contact point (22) and a contact point (24) located on the printed conductor (16), opposite the contact point (22), is a breakthrough (20) in the support (10). Said breakthrough (20) is filled with an electrically conducting material (EL).
