Abstract (en)
[origin: WO2008128555A1] The invention relates to a method for producing and/or modifying an entry (name 1, name 2, name N) in a communication directory (KV). The entry is produced and/or modified by means of a terminal (EG) that is associated with or to be associated with the corresponding entry (name 1, name 2,..., name N). In a first step, a communication address of the terminal (EG) is determined and stored in the terminal (EG), in a second step, the terminal (EG) establishes a connection to an administration instance (VI) for the communication directory (KV), in a third step, an identification is carried out in the administration instance (VI), and in a fourth step, the terminal (EG) transmits the data required for producing and/or modifying the entry (name 1, name 2,..., name N) to the administration instance (VI) and utilizes them therein.
