Abstract (en)

[origin: EP2145699A1] A high-pressure washer (1) for delivering a liquid is described, which can be placed in a first position and a second position, and comprises: - a frame (2), - a heater (7) for providing heating for the liquid by combustion, - a fuel tank (4) for storing a fuel (36) for the heater (7), where the fuel tank (4) has a first hose connection (43) and a second hose connection (42). The high-pressure washer further comprises - an outer hose connection (46), - a first ventilation hose (45) coupled to the first hose connection (43) and to the outer hose connection (46), - a second ventilation hose (44) coupled to the second hose connection (42) and to the outer hose connection (46), and - an outer ventilation hose (47) coupled to the outer hose connection (46) and having an outer opening (48) to the ambient air.
