Abstract (en)

[origin: EP2145992A1] The laundry drum has a drum body (4) comprising structures distributed in a circumferential direction (10), where the distributed structures elevate from a cylinder form of the drum body attached in the drum. The structures are formed from ring shaped embossments (8), which are arranged in rows (6). The rows extend parallel to the circumferential direction. The ring shaped embossments exhibit different diameter, where the rows not lie parallel to an outer line of the drum body.
