Abstract (en)  
[origin: EP2146011A2] The device has hot (2) and cold water lines leading to a mixer, at least one shower head connected by a mixed water line (6) to the mixer outlet, a bypass line (3) from the cold line to the mixed line, a valve in the bypass line and an actuating element for opening and closing the valve. The valve is a slide valve (9) formed in a volume transited by the bypass line and the hot or mixed water line and movable between a state that blocks the bypass line and opens the hot or mixed water line and a state that opens the bypass line and blocks the hot or mixed water line.
