Abstract (en)
[origin: EP2146039A2] The pane (1) has two outer panes (2, 3) and an edge connection (4) provided with a spacer profile (5). The spacer profile has two opposed contact surfaces (12) that are connected to the outer panes via an adhesive layer (11) in a shear-resistant manner. The spacer profile has an articulated region (13) designed such that the two contact surfaces are partially rotated to reduce stresses in the adhesive layer. The spacer profile has regions connected to each other in a shear-resistant manner. The spacer profile is constructed from high-strength glass-fiber-reinforced plastic.
