Abstract (en)
[origin: EP2146041A2] In the method according to the invention for the construction of a plastic frame 1 with a wood look, horizontal and vertical frame parts 3, 5, are connected together with mitre joints. A side in view 7 of the frame is then sanded flat by the connection joints 13. A groove 15 is then made near each corner of the frame in the extension of the horizontal rectangular side 17 of the inner circumference edge 9 in the vertical frame part 5. Finally, the side in view 7 of the frame 1 is provided with a layer of paint or foil 19, which covers the flat sanded connection joints 13, so that they are no longer visible.
