Abstract (en)
[origin: EP2146164A2] The present invention relates to a household refrigeration appliance (1), in particular of the no-frost type, fitted with at least one inner compartment (10, 20) for preserving foodstuffs and with a refrigerating chamber (30) comprising: - an evaporator (31) adapted to cool the air; - a fan (32), associated with a motor (33), for circulating the air inside said at least one inner compartment (10, 20). The invention is characterized in that said evaporator (31) comprises a conveying septum (35) adapted to subdivide said refrigerating chamber (30) into a first compartment (30a) and a second compartment (30b), and to convey the air flow into said first (30a) and second (30b) compartment.
