Abstract (en)

[origin: EP2146169A1] The device (1) has a fastening component for fastening the device to a coolant cooler, and a fastening component for fastening the device to a coolant condenser (2). A connection between the latter fastening component and the coolant condenser is provided in a corner (5) of the condenser in a form fit manner. The connection is provided in both directions of horizontal x and y axes and two directions of a vertical axis of a square coordinate system (13). A partition wall is provided at the condenser, and a slot is provided at the device.
