Abstract (en)
[origin: DE102007025764B3] The sweeping machine (10) has a sweeping device (24), a carrier part (22) and a sweeping container (32) is held at the carrier part, in which the sweeping container is carried by the sweeping device. A gripping device (44) is held with a gripping element (46) at the sweeping container. The gripping device of the operating position is engaged in the operation of the sweeping machine. The gripping device is transferred from the operating position to transport position and reversed. The gripping element is spaced in the transport position by the sweeping container as in the operating position.
