Abstract (en)  
[origin: WO2008128661A1] In the strapping machine (10) according to the invention, in which a strap guiding lance is inserted under the packaged goods through a penetrating opening provided in a pallet in order to create a circumferential strap channel into which a strap (12) can be shot to produce a strapping, a particularly strong, but also lightweight design of the strap guiding lance (23) is proposed, allowing rapid and precise insertion of the lance.
