Abstract (en)
[origin: WO2008128505A2] Disclosed is a pulper for separating fibers from a mixture. Said pulper comprises a perforated metal sheet, the holes of which have a diameter of less than 5 mm. The extremely small hole diameters are not clogged by the mixture in the pulper because harder materials in the mixture keep exposing the holes. Said pulper thus significantly reduces the effort for aftertreating the mixtures.
