Abstract (en)
[origin: WO2008135174A1] The invention relates to a security paper for producing security documents or valuable documents. Said paper comprises a film element (18) which is transparent in at least some sections and which is freely accessible through the security paper (14) on at least one side of the security paper (14) in at least sections (16). The invention is characterized in that the film element (18) is connected to the security paper (14) via an adhesive layer (20) which is highly transparent and clear in the area of the freely accessible sections (16).
