Abstract (en)

[origin: DE202007005292U1] The vehicle door has a turning lock arrangement (2) and a release mechanism (9) so that lock is unlockable. The lock has a casing (3) having a recess (11) for a closing pin. Two turning locks (10) are provided and are swivellingly stored and have a spring (18) such as a turning lock opening direction of rotation (D), and propelable in connection. The release mechanism (9) has a lever (28) with a pawl (23) operable by means of a close-operable release mechanism and operable by a release mechanism.
