Abstract (en)

[origin: DE102007017916B3] The arrangement has rotary bolts (18a, 18b, 24a, 24b) pointing perpendicularly in a direction of a housing (22) and connected with a door (14). The rotary bolts are brought in engagement in rotary bolt receivers (20a, 20b, 26a, 26b) at the housing. The bolts are brought from a withdrawn position, in which the bolts do not stay in engagement with the bolt receivers, into a lowered position, in which the bolts stay in engagement with the bolt receivers. An unlockable, spring prestressed locking device is effective at the bolts and retains the bolts in the withdrawn position.
