Abstract (en)

[origin: WO2008141350A2] The invention relates to a switch element (1) comprising an actuating element (3) that can be impinged upon by an energy accumulator and is mounted so that it can be moved along a trajectory. At least two energy accumulators (2a, 2b) are used to impinge the actuating element (3) and the number of the energy accumulators (2a, 2b) impinging the actuating element (3) varies in predetermined positions (S₁, S₂) of the trajectory (S).
