Abstract (en)
[origin: WO2008138760A1] The invention relates to a cooker protective device comprising a housing unit (10), with at least one receiving region (12) for receiving at least one electronic unit (14) and at least one screening unit (16), provided to screen the housing unit (10) from a heating means (18). According to the invention, an effective screening effect may be achieved in a space-saving manner wherein the screening unit (16) is fixed to the housing unit (10).
