Abstract (en)
[origin: EP2148026A1] The bolt work has a check bolt unit (10) arranged at a door, which is lockable opposite to a check unit (20) or such a thing formed in a door frame. A slider (30) is coupled with a check bolt unit over a drive bit (54), where the drive bit is adjustable by a door lever at control equipment (50) and is firmly arranged and intervenes in a groove (32) formed in the slider. Another slider (40) is provided, which has another groove, where former slider is adjustably supported between two end positions.
