Abstract (en)
The device has a control valve that comprises a valve body (18). The valve body is designed with a closing element (40) and a guiding element (54) as a two piece, where the guiding element is designed as a valve pin (55). The valve pin is guided into a guiding sleeve (30) in a movable manner. The closing element comprises of a valve circular body (42). The valve circular body comprises of a circular sealing surface (44), and is pressed on the guiding element. The guiding element comprises of a passage unit (56), where the closing element and the guiding element exhibit different hardness. The guiding sleeve has a form of a circular cylinder casing. The closing element and the guiding element are made of different materials.

Abstract (de)
Die Erfindung betrifft eine Kraftstoffeinspritzventileinrichtung mit einem Steuerventil, das einen Ventilkörper (18) umfasst. Um die Herstellung einer Kraftstoffeinspritzventileinrichtung mit einem Steuerventil, das einen Ventilkörper umfasst, zu vereinfachen und/oder deren Lebensdauer zu verlängern, ist der Ventilkörper (18) mindestens zweiteilig mit einem Schließelement (40) und einem Führungselement (54) ausgeführt.
