Abstract (en)  
[origin: WO2006015903A1] The invention relates to a mobile telephone (10) comprising a base unit (12), which has a display unit (14) on its upper face and an input unit (20, 30), which can be displaced in relation to the base unit (12). The upper face of said input unit is equipped with input elements and the unit is connected or can be connected to the base unit (12) by means of a pivot joint (24, 34). In addition, the rotational axis of the pivot joint (24, 34) runs essentially perpendicular to the surface of the base unit (12).
