Abstract (en)  
[origin: WO2008142408A2] A graphics panel support, for use with a slotted wall, is an elongate member with a bight portion (5) for accommodation within a slot in the wall and two arms (7, 9) which extend from the bight portion to the front surface of the wall. At least one of the arms has a finger (11) which overlies the front surface of the wall and is spaced therefrom, so that an edge of a graphics panel may be located between the finger and the front surface of the wall.
