Abstract (en)
A mounting device (10; 100; 200) for hanging furniture is described comprising a substantially flat plate (12; 112; 212) to be fixed to the furniture; and a hooking member (16; 115; 215) associated to the plate and configured to be hung, in use, to a fixed connector (S) on the wall. To avoid disengagement from the fixed connector there are adjustable blocking means (50; 150; 250) adapted to engage the fixed connector below the suspension point of the hooking member, thereby maintaining the hooking member always restrained to the fixed connector.
