Abstract (en)
[origin: EP2149534A1] The assembly (2) has a cabin (6) arranged in a lift shaft (4). A lift control unit (10) and a control system (16) for smoke removal from the shaft with an associated dot-shaped smoke detector (18) are provided. The control system for smoke removal from the shaft is a component of the lift control unit. The lift control unit is a part of a lift control system that is installed as a bus system. Information such as sensor data and control commands, regarding the control system for smoke removal is transferable from the bus system of the lift control unit.
