Abstract (en)
[origin: EP2149644A2] The valve (1) has a housing (3) provided with a valve seat (5) that defines a discharge opening (4). An overflow tube (6) comprises of upper parts and lower parts (6b) and is movably supported along a longitudinal axis (X) in the housing. The tube is provided with a seal (7) i.e seal disk, that co-acts with the valve seat at a lower end. The housing has an upper housing part (3a) and a lower housing part (3b), which are connected together in a swivelable manner via one of joint connections (8, 10). The valve seat is swivelable relative to the upper housing part and/or the overflow tube. An independent claim is also included for a cistern comprising an inspection opening.
