Abstract (en)

[origin: EP2149653A2] The wall edge formwork (3) has a step formwork unit (4) and a holder (5) for the step formwork unit, which is fastened to reinforcement (6) of the base plate (1). The holder holds the step formwork unit for concreting the step (2) with vertical distance over the reinforcement. The step formwork unit has a vertical step formwork section (7) for concreting the step and a horizontal base formwork section for concreting a storage space (9) for a single-face wall formwork. An independent claim is included for a method for positioning a single-face wall formwork with form work panels and brace frames on a base plate made of concrete.
