Abstract (en)

[origin: EP2149657A1] The key (1) has a shaft (9), a key chest (11) arranged on the shaft and a key back (12) averted to the key chest. An angle of inclination of insertion path (14) for the longitudinal axis of the shaft at a key point (13) is smaller than an angle of inclination of the insertion path at a next closing notch (10). The insertion path has two chamfers. An independent claim is included for a blank for a key.
