Abstract (en)
[origin: EP2149737A2] The system has a connector (3) for connecting a plate (1) e.g. sandwich plate, and a sectional strip in a connected position. The connector is attached on contact surfaces (5) of the respective plate and strip in a linearly running attachment direction (7) by pressure surfaces of the connector. The contact surfaces and/or pressure surfaces are sectionally arranged transverse to the attachment direction. The pressure surfaces lie at the contact surfaces and press front surfaces of the respective plate and strip against each other. The plate is limited at its front surface by an edge profile.
