Abstract (en)  
[origin: WO2008137911A1] A sleeping bag (20) having a top (24), a bottom (26), a primary attachment structure (28) for attaching the top to the bottom so as to form a bag, and a secondary attachment structure (34), independent of the primary attachment structure, that is releasable to create an opening to provide access to an inside of the sleeping bag and that is closable to close the opening. A mesh panel (40) covers the opening when the secondary attachment structure is released.
