Abstract (en)  
[origin: WO2008132566A1] The process for wrapping palletised loads comprises the following phases: Placing a first palletised load (4) on top of a first rotating platform (2); wrapping the first palletised load placed on top of the first rotating platform with a first stabilising wrap; moving the first palletised load away from the first rotating platform; placing a second palletised load (5) on top of the first rotating platform; wrapping the second palletised load placed on top of the first rotating platform with the first stabilising wrap; moving the "second palletised load away from the first rotating platform; positioning the first and second palletised loads (4, 5) in a double wrapping configuration where the first and second palletised loads are substantially side by side and together on top of a second rotating platform (3); wrapping together the first and second palletised loads in the double wrapping configuration with the second stabilising wrap.
