Abstract (en)

[origin: WO2008145576A1] The invention relates to a lighting device having a rail device (2) that can be fixed to a surface of an object (11), said rail device having two interspaced rails (21, 22) to which a lamp (3) can be fixed and supplied with power. The rails (21, 22) are electrically connected to a transformer (5). At least one first lamp (3) is arranged on the rails (21, 22) and can be supplied with low-voltage power via the transformer (5) and the rails (21, 22). At least one second lamp (6) is arranged on a housing (51) of the transformer (5) and is supplied with mains voltage.
