Abstract (en)

[origin: WO2008145833A2] Method for placing one vehicle of a group of individual public vehicles at the disposal of a user, the said method being characterized in that it comprises the following steps: receiving from each individual public vehicle information including the geographic position of the vehicle, creating a database including the information of the geographic positions of the vehicles, receiving a request to place a vehicle at the disposal of the user in a position, using the database to identify a vehicle available in this position or close to this position, and sending the user the information relating to the actual exact position of the available vehicle.
